

WISCONSIN LONG TRUCK OPERATORS MAP

Designated Long Truck Routes identified in Trans 276.07

The truck operator map identifies the Wisconsin highways for operation of vehicles and combinations of vehicles the overall lengths of which cannot be limited. Trans. 276 clarifies other statutory provisions or federal rules affecting the weight, width, and length of vehicles and combinations of vehicles and the number of vehicles in combination. Wisconsin Truck Operators map conforms to Highways and Transportation Laws and Rules, Chapter Trans. 276, Size and Weight of Vehicles and Vehicle Combinations.

Trans 276.077 Designated access routes for 75-foot vehicles
Pursuant to s. 348.07 (4), Stats., the intersection of any 75-foot restricted route and any other highway is designated as a highway upon which operation of vehicles with a maximum length of 75 feet are permitted to operate. The purpose of this provision is to permit such tractor-semitrailer combinations access to locations within 15 miles of 75-foot restricted routes to reach fuel, food, maintenance, repair, rest, staging, terminal or vehicle assembly facilities or points of loading or unloading, as permitted by s. 348.07 (4), Stats.

Trans 276.10 Tire load carrying capacity in excess of 13,000 pounds
Trans 276.10(1)
(1) Subject to the restrictions and limitations in sub. (2), the weight on the steering axle of a truck tractor may exceed 13,000 pounds if the sum of the maximum load carrying capacities of the tires used on that axle, as certified by the tire manufacturer, allows a greater steering axle load.

Trans 276.10(2)
(2) Trans 276.10(2)(a)
(a) The actual weight on the steering axle of a truck tractor may not exceed the sum of the maximum load carrying capacities of the tires used on that axle and in any event may not exceed 20,000 pounds.

Trans 276.10(2)(b)
(b) The extra weight privilege allowed by this chapter is available only when the tires used on the steering axle of a truck tractor have the manufacturer's certified load carrying capacity embossed thereon in compliance with applicable federal regulations. If the tires on a steering axle have no certified load carrying capacity embossed on them, the steering axle is restricted to the 13,000 pound load limit prescribed in s. 348.15 (3) (b), Stats.

Trans 276.10(2)(c)
(c) This chapter does not authorize the operator of a truck tractor to exceed the gross axle weight rating (G.A.W.R.) established by the manufacturer of the steering axle being used.

Trans 276.10(2)(d)
(d) The tires on the steering axle of a truck tractor exceeding the statutory 13,000 pound weight limit shall have equal load carrying capacity and shall be properly inflated.

Legend

- DESIGNATED LONG TRUCK ROUTE
- 75' Restricted Truck Route (53' trailer, 43' king pin to rear axle, no double bottoms)
- 65' Restricted Truck Route (48' trailer, no double bottoms)
- Rest Area
